Text is shown as picture when editing - Adobe Support Community
It sounds like your PDF might be a scanned document or an image-based PDF rather than a text-based one. When you open it in Edit mode, Adobe automatically detects the content, but if the text appears as separate images, it likely means the document doesn't...

Re: PDF with image infront of text form field help
23. Nov. 2025 · Is it possible to get the image to go infront of the text and still make the text editable as part of the pdf form? I have tried selecting the image and bringing to front but it still shows behind the text (as above). Hope this makes sense, thank you for your he...

How to make a PDF file with text being like images?
I don't want the text in the file to be recognised as text but as images because I want to avoid any errors when opening the pdf file on different systems and devices.

 **Win2PDF**
